# AMS Compatible Devices

Overview

In general AMS works on Android and iOS devices. The latest version of AMS requires Android 5.0+ and iOS 11.0. Older versions are available for earlier devices. Contact AMS support (support@ams.io) for details about a specific device.
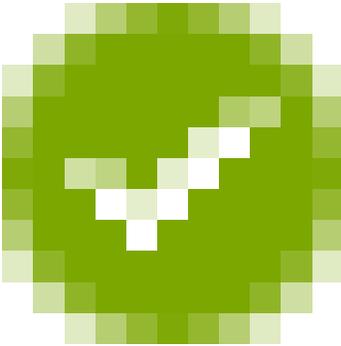

> ⊘ **Device Compatability**
> We recommend checking AMS will work on your device before making any bulk purchases. We can assist to discuss the options that best suit your needs. In many cases existing devices can be used.

iOS

Device type	Deployment Options	Tested
iPhone	Available through the VPP or Enterprise Licence programs	✅
iPad	Available through the VPP or Enterprise Licence programs	✅

iPod	Available through the VPP or Enterprise Licence programs	

Links to iOS deployment options

For both of these options you need a Duns number.

In New Zealand you ring **Dun and Bradstreet.**

Ring: 0800 362 222

or

http://dnb.co.nz/duns-number.html#.V8S2hTUwpvg

If you have your Company Incorporation number, you may get your Duns number on the spot.

Option One: Volume Purchase Program (VPP)

http://www.apple.com/business/vpp/

Process

For VPP we'll need your account name with Apple and we have to customise AMS before submitting to Apple for review. The customisation is usually just a case of applying your organisations logo to the splash image within AMS. Please email a high resolution logo to john@ams.io for use in the application.

Before submitting we also need some feedback on the changes we've made to AMS for your account.. To do this please add one device to our TestFlight account via the http://tflig.ht/1nd0TT5 (visit from the desired test device). The TestFlight service will allow us to send you a test copy of AMS with the modifications for review.

Option Two: Enterprise Licence

https://developer.apple.com/programs/ios/enterprise/
https://developer.apple.com/programs/start/enterprise/

Process

Once you have an Enterprise Developer account for which there is an annual fee payable to Apple (US$300 approx) we need to build and sign AMS with your Distribution certificate (if they have already created one).

Basically we need to build the app with your Enterprise Provisioning Profile. This is an annual process so as soon as you get a renewal notice (30 days notice and a 15 day notice) it's best to start the process so that we all have time to complete. If the renewal is not done, your iOS devices will simply stop working on the renewal date.

http://www.maas360.com/maasters/forums/mobile-app-management-mam/show/332/building-ios-apps-for-enterprise-deployment

There is a further one off charge for Signing AMS with your Distribution certificate and purchase of Signature component.

This is **NZ$480** GST incl.

Sample of Second renewal notice sent from Apple.

On receipt of this notice it is essential that you complete the renewal process and advise us so we have time to complete the process. Min of 3 days required.

Dear Client

In 15 days, you will no longer have access to membership benefits. Renew your Apple Developer Enterprise Program membership to keep your existing apps functioning, create new in-house apps, and get personal technical support.

Renew now

Best regards,
Apple Developer Program Support

Android

Version 2.0+ of AMS for Android requires OS 5.0+ or greater to run. Version 1.8.2 is the last version to run on Android 4.0+. Version 1.8.1 is the last version to run on 2.2+.

BlackBerry

No longer supported. Can be run on BlackBerry OS 7 devices.

J2ME

No longer supported. Can be run on MIDP 2.1 compatible devices.
